- **2019 / 2026 Member of the Board in Finnish Pirate Party**
- **2004 Candidate in European Parliament Elections**
- **2003 / 2010 Member of the Board in Finnish Liberal Party**

Hobby projects

- **2023 Juttukaveri (<https://juttukaveri.com>)**
 - Technologies: Python, Django, Vue.js, TypeScript
 - Voice interface to OpenAI's ChatGPT. Backend with Python/Django using Django REST framework, frontend using Vue 3 + TypeScript. Open source, available in GitHub.
- **2023 Covid-questionnaire (<https://koronavaalikone.fi>)**
 - Technologies: Python, Django, Vue.js, TypeScript
 - Covid-related questionnaire to 2023 parliament election candidates. Backend with Python/Django using Django REST framework, frontend using Vue 3 + TypeScript with Pinia store and unit tests with Vitest. Open source, available in GitHub: backend, frontend.
- **2021 Where To Go For Lunch (<https://wtgfl.com>)**
 - Technologies: Python, Django, Vue.js, TypeScript
 - Multiple-choice voting service using advanced election methods. Backend with Python/Django using Django REST framework, frontend using Vue 3 + TypeScript. Open source, available in GitHub: backend, frontend.
- **2020 Exposures (<https://altistukset.fi>)**
 - Technologies: Python, Django, Vue.js
 - Corona exposure event database and report generator. Open source, available in Github.
- **2017 CVDB (<https://cvdb.fi>)**
 - Technologies: Python, Django, BDD, CI
 - CV/Resume database made with Django. Open source, available in Github.
- **2016 Mitasny (<http://mitasny.com>)**
 - Technologies: Python, Django, Javascript, TDD, CI
 - Simple task/project manager made with Django using TDD. Open source, available in Github.
- **2015 Plokkeri (<https://plokkeri.fi>)**
 - Technologies: Python, Django, TDD, CI
 - Simple blogging platform. Open source, available in Github.

- **2012 Tyranny of Majority (<https://tyrannyofmajority.net>)**
 - Technologies: Python, Django, MySQL, HTML5, Javascript
 - Web based collective decision-making tool for polling, voting and elections. Made with Python/Django, also used several other tools such as git, MySQL, HTML5, JavaScript etc.
